

## **Maternity Safety Statement**

This is a monthly report, specific to the hospital named below setting out a range of information on the safety of maternity services.

Hospital Name	Mayo University Hospital	Reporting Month	May 2023		
	This Statement is used to inform local hospital and hospital Group management in carrying out their role in safety and quality improvement. The objective in publishing the Statement each month is to provide public assurance that maternity services are delivered in an environment that promotes open disclosure.				
	It is not intended that the monthly Statement be used as a comparator with other units or that statements would be aggregated at hospital Group or national level. It assists in an early warning mechanism for issues that require local action and/ or escalation				
Purpose & Context	It is important to note tertiary and referral maternity centres will care for a higher complexity of patients (mothers and babies), therefore clinical activity in these centres will be higher and therefore no comparisons should be drawn with units that do not look after complex cases.				
	Maternity Safety Statements form part of the suite of key performance indicators for the maternity services. Hospitals must populate and publish on a monthly basis (2 months in arrears). Additionally the statements are discussed at the Hospital Group Maternity Network meetings with the National Women and Infants Health Programme as part of the quality and safety agenda.				

Headings	Ref	Ref Information Areas	2023	
	IXCI	Internation Areas	May	YTD
Hospital Activities	1	Total mothers delivered ≥ 500g (n)	100	532
	2	Multiple pregnancies (n)	2	10
	3	Total births ≥ 500g (n)	102	542
	4	Perinatal mortality rate – adjusted (per 1,000 total births)	0.0 Per 1,000	0.0 Per 1,000
	5	In utero transfer – admitted (n)	0	0
	6	In utero transfer – sent out (n)	2	9
Major Obstetric Events	7	Total combined rate (per 1,000 total mothers delivered) of major obstetric events for the following four obstetric metrics:  Eclampsia;  Uterine rupture;  Peripartum hysterectomy; and  Pulmonary embolism.	0.0 Per 1,000	0.0 Per 1,000

Headings Re	Ref	Information Areas	2023	
	IXCI		May	YTD
Delivery Metrics	8	Rate of instrumental delivery per total mothers delivered (%)	16.0%	13.5%
	9	Rate of nulliparas with instrumental delivery (%)	40.6%	30.6%
	10	Rate of multiparas with instrumental delivery (%)	4.4%	4.6%
	11	Rate of induction of labour per total mothers delivered (%)	35.0%	28.2%
